

ALEJANDRO DELGADILLO

Senior Software Engineer

 al3xdelgadillo@gmail.com  +52 557 423 9369  alexdelgadillo.dev  linkedin.com/in/alejandrodelgadillos  Mexico City, Mexico

Senior Software Engineer with 6+ years of proven expertise in architecting and delivering scalable, high-performance applications for Fortune 500 financial institutions. Track record of improving code performance by 20%, managing platforms serving 400K+ customers, and providing technical mentorship to development teams. Deep expertise in .NET Core, Angular, React, Next.js, and cloud platforms (Azure, AWS, GCP). Recently focused on building AI-powered systems using LLMs, RAG, and agent-based architectures to deliver scalable and intelligent solutions. Specialized in microservices architecture, clean code principles, and DevOps practices with Docker, Kubernetes, and CI/CD pipelines. Passionate about continuous learning and driving technical excellence in fast-paced environments.

Professional Experience

Senior Software Engineer

2024 - Present

PwC (Eclipse Advisory - Fit for Growth)

- AI Advisory Platform:** Designed and delivered an AI-powered advisory platform using LangGraph, RAG, and microservices to process complex financial data and generate actionable insights
- Scalable Architecture:** Integrated vector search (Qdrant), Redis caching, and Azure cloud services, enabling scalable data processing and real-time workflows
- Quality & Validation:** Implemented human-in-the-loop validation processes and LLM-based evaluation mechanisms to ensure output quality and reliability

Senior Software Engineer

November 2024 - Present

KUNAI (part of PwC Network)

Client: Capital One (100M+ customers)

- Loan Validation Platform:** Engineered critical features for Capital One's loan assessment platform, validating loan viability and risk assessment for one of the largest US banks
- Code Quality & Architecture:** Improved code performance by 20% through implementing clean architecture patterns and modernizing legacy systems
- Comprehensive Testing:** Developed extensive unit tests for the entire loan validation section using .NET, ensuring 95%+ code coverage and system reliability
- Frontend Optimization:** Led front-end improvements enhancing user experience and application performance for loan processing workflows
- Cloud Infrastructure:** Configured and optimized AWS cloud services, ensuring high availability and scalability for critical financial services
- Team Collaboration:** Provided technical guidance and mentorship to team members on best practices, design patterns, and architectural decisions
- Microservices Development:** Built and maintained microservices architecture improving system modularity and resilience

Senior Full Stack Developer

February 2022 - November 2024

EVIDEN

Client: Axos Bank

- Promotion to Senior Developer:** Advanced to Senior role, mentoring 2 junior developers and sharing expertise in banking technologies and best practices
- Banking Platform (Axos Bank - 400K+ customers):** Engineered and maintained a complete banking platform with RESTful APIs managing multiple US bank accounts for 400,000+ customers across 3 simultaneous projects
- Move Money Process Owner:** End-to-end ownership of the bank's money transfer process, ensuring secure, compliant, and efficient transactions handling millions in daily transfers
- E-Learning Platform:** Developed from scratch a learning platform for new hires implementing CRUD operations, RESTful APIs, and Clean Architecture
- Microservices Architecture:** Designed resilient and responsive architecture integrating SQL Server, MongoDB, RabbitMQ, and Polly for fault handling across multiple projects
- Containerization & DevOps:** Implemented Docker for seamless deployments and automatic application scalability
- System Reliability:** Maintained 99.9% uptime for critical banking services through robust error handling, monitoring, and SOLID principles

Full Stack Developer

September 2021 - January 2022

THOMSON REUTERS

- Front End Migration:** Actively contributed to the application migration to Angular 13, improving performance and maintainability
- Technical Documentation:** Updated and enhanced technical articles for NodeJS and .NET, facilitating team adoption of best practices
- Proprietary Platform:** Developed features for the internal platform using PostgreSQL, C#, .NET Core, Node.js, and JavaScript

- Mobile Application Developer

INBURSA

- **FacePass Integration:** Implemented facial recognition functionality in the mobile banking app through external microservices
 - **API Development:** Created custom API for acquired application, including UI modifications and critical issue resolution
 - **Cross-platform Development:** Built mobile applications using Xamarin, C#, Node.js, and Dart

August 2021 - September 2022
- IT Software Engineer

KPMG

- Developed enterprise software solutions for consulting clients
 - Implemented software engineering best practices and agile methodologies

August 2020 - August 2021
- Trainee / Junior Developer

TECLA

- Started professional career developing web applications and acquiring solid Full Stack fundamentals
 - Active participation in team projects and learning modern technologies

January 2019 - August 2020

Technical Skills

Backend	Frontend	Cloud & DevOps	Databases
C# • .NET Core • Node.js • NestJS • Python	Angular • React • Next.js • JavaScript • TypeScript • HTML/CSS • Dart/Flutter	Azure • AWS • GCP • Docker • Kubernetes • Jenkins • Git • Bitbucket	SQL Server • PostgreSQL • MongoDB • Relational DBs • NoSQL • Vector Databases
Architecture & Integration	Messaging	AI	
Microservices • Clean Architecture • Design Patterns • SOLID • RESTful APIs • Webhooks	RabbitMQ • Polly	LangGraph • RAG • LLMs • Qdrant • Prompt Engineering	

Education

- Master's Degree in Analytics and Business Intelligence

Universidad Tecnológica de México | To be completed late 2026
- Bachelor's Degree in Computer Systems Engineering

Universidad Tecnológica de México
